PROJECTS

City Bazar Online | E-commerce Web Application

- A modern **e-commerce** application designed for the local market of Indore city in India. As a Frontend developer, I utilized **Next.js** to create **dynamic user interfaces**, improving usability and efficiency.
- Optimized application performance, reducing load times and improving user retention.
- Leveraged **Next.js** to create web applications serving over **2M users**. Implemented SEO best practices, including server-side rendering and optimized meta tags, to enhance search engine visibility and organic traffic.

SAPTEL | ERP Application

- Built the entire frontend using **React.js**, increasing test coverage by **12%** and improving performance and scalability, resulting in a **20%** boost in overall system efficiency.
- Developed for a large **call center company**, optimizing workflows and resource management. and integrating complex **data visualization** tools for handling large datasets.
- Designed scalable **REST** and **GraphQL APIs** using **TypeScript**, **Node.js**, and **Redis**, and collaborated with **third-party APIs**, including courier services and barcode implementation, enhancing application functionality.

EXPERIENCE

Codiotic Technologies Pvt Ltd | Indore, India

– Full-Stack Software Engineer Dec. 2022 – Present

- Distinguished as a skilled Full Stack Software Engineer with expertise in **MERN stack** development, consistently delivering top-tier solutions across various industries.
- Design, Implement, test, and refactor core financial services that process all transactional data.
- Pioneered the creation of cutting-edge stock **trading applications** in record time as a frontend developer, facilitating automatic stock purchases based on peer selections, with seamless real-time stock listing and tracking.

Freelancer | Remote | Indore, India –

Frontend Software Engineer July 2020 – Dec 2022

- Developed a **React Native** mobile application with **Python Flask APIs** for secure user communication, designed specifically for company use. Implemented real-time messaging using **WebSocket** for seamless communication, alongside advanced sender anonymity features ensuring message sender confidentiality.
- Full-stack development on Jewelry applications using **React**, **TypeScript**, **Node.js**, and **MongoDB**.
- Designed and developed a **Qatar based real-estate** website with extensive design elements, integrating **WhatsApp API** for easy **client query** tracking and company information display.
