SUMMARY

Frontend Engineer with 3+ years of experience building high-scale SaaS and web applications in React.js, Next.js, and React Native, seeking full-time Frontend roles. Proven ability to own end-to-end frontend development, lead teams, optimize performance, and collaborate with backend and product teams to deliver business-critical features.

SKILLS SUMMARY

- **Languages:** JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
- **Frameworks:** React.js, Next.js (App Router), Angular, Vite, Remix, React Native, jQuery, Node.js, Express.js
- **Styling:** Tailwind CSS, Shadcn UI, Material UI, Ant Design, Design Systems
- **State & Data:** Redux Toolkit, RTK Query, Zustand, React Query, GraphQL, RESTful API Design
- **Performance:** Code Splitting, Lazy Loading, Lighthouse, Web Vitals, PageSpeed Insights, Atomic Design Principles
- **Concepts:** Microservices, LLM API Integration, System Design, Micro-Frontends, Agile/Scrum
- **Tools & Testing:** Git, Webpack, NPM, Figma, AWS (S3, EC2), Jenkins, Vercel, CI/CD, Jest (Unit), Cypress, AI-Assisted Development (Cursor, GitHub Copilot)

EXPERIENCE

- **Provista Solution Pvt. Ltd.** Indore, India
Full Stack Developer (Full-time) Nov 2024 - Present
 - **Direct Hire:** Directly recruited from a previous firm to spearhead end-to-end development of the SAPTEL ERP from scratch, architecting a high-performance system for complex order lifecycle management.
 - **Technical Gatekeeper:** Appointed as the sole technical authority for the web department, overseeing 60+ active websites and giving final architectural and design approval for all CRM and EdTech products.
 - **Team Leadership:** Led a team of 4+ developers in building responsive, performance-optimized e-commerce applications using atomic design principles, improving both usability and long-term maintainability.
- **Codiotic Technologies Pvt. Ltd.** Indore, India
Software Developer (Intern, Full-time) Nov 2022 - Oct 2024
 - **Growth:** Promoted from Intern to Full-Time Developer within 3 months by delivering high-performance frontend architectures and modular, reusable component libraries that cut UI development time significantly.
 - **Mobile Development:** Built and maintained cross-platform mobile apps using React Native with a focus on performance optimization and smooth API integration for E-Commerce and CRM platforms.
 - **Component Library:** Designed reusable React component libraries adopted across multiple projects, reducing redundant code and speeding up delivery cycles for the dev team.

PROJECTS

- **SAPTEL | ERP for Telemarketing (React, Node.js, RBAC, Typescript, Dialer API, Atomic Design):** Built a full-cycle Telemarketing Company ERP handling order punching, warehouse dispatch, and customer returns, connected third-party dialer API to show caller data for 64K+ inbound calls and courier API for auto order assignment; added barcode scanning, role-based access for 700+ agents, real-time dashboard, and it delivered 5K+ orders.
- **City Bazar Online | Multi-Vendor E-Commerce Platform (Atomic Design, Next.js, React, SSR, SEO):** As a top intern, built maximum features and merged the most branches on the team; migrated platform from PHP to Next.js reducing load time from 6–10 seconds to milliseconds; integrated Paytm payment gateway for secure checkout; worked on UI, SEO, and performance for 400K+ users and 500+ merchants; drove 60% organic traffic growth via SSR and Core Web Vitals optimization.
- **Smart Learning Destination | EdTech Platform for CA/CMA/CS Students (Next.js, React, CRM, E-Commerce):** Redesigned full UI from scratch based on Figma designs, adding interactive components and improved UX across the platform; optimized landing page rendering for 300+ CA faculty listings with images using lazy loading and debouncing for smooth performance; implemented course comparison feature supporting 2–3 simultaneous courses; built cart system using localStorage for persistent session management, SEO via SSR, semantic HTML, and targeted meta-tag strategies.
- **Codiotic Connect | Internal Project Management Tool (React, react-beautiful-dnd, Socket.io):** Built a Jira-style platform to boost developer productivity – features include drag-and-drop kanban boards using `react-beautiful-dnd`, ticket assignment, sprint timelines, branch merge tracking, and real-time team chat via Socket.io WebSockets; helped teams deliver tasks and hit merge deadlines before sprint cutoffs.

EDUCATION & CERTIFICATIONS

- **ILVA Commerce & Science College** Indore, India
Bachelor of Computer Applications (BCA) – Pursued 2020 – 2022
- **CS50x: Introduction to Computer Science:** Harvard University – Algorithms, data structures, web development, and software engineering.
- **Agile with Atlassian Jira:** Atlassian University – Agile workflows, sprint planning, and backlog management.
- **ReactJS Specialist:** Infosys – Advanced React patterns, component architecture, and React hooks.
- **JavaScript Specialist:** Infosys – Modern JavaScript (ES6+), async programming, and core JS fundamentals.

AWARDS & ACHIEVEMENTS

- Awarded Best Developer at Provista Solution Pvt. Ltd. for outstanding performance and on-time delivery of business-critical features.
- Earned Pull Shark achievement on GitHub – awarded for consistently contributing merged pull requests to open source repositories.
- Earned Quickdraw achievement on GitHub – awarded for closing issues and pull requests within minutes of opening.
